

23rd October 2026

Dear Parents/Carers,

After the half term break – w/c 2nd November, we will be sending out homework for the Year 6 children to complete each week. The purpose of the homework is to support the children in preparation for their transition to Secondary School where they will be expected to complete homework on a regular basis.

The homework books that will form the tasks, will be provided by school and are based on: Mathematics, Reading and GPS. Each week the children will be given a task to complete from each book that will be a revision task (this will be a subject that we have already covered in class). Each task should take no longer than 20-30 minutes.

As previously mentioned, it is really important to support the children in preparation for transition, where they will be expected to become more independent and meet deadlines. During the week, the children will work in groups to go through their tasks and discuss any issues that arise.

To support and encourage the children with these skills, we will be holding a homework club every Monday evening straight after school. During the club, the children will be given the opportunity to complete any of the tasks that are set for the week and staff will be on hand to support them in any way needed. The club will run until 4pm and everyone is welcome to attend.

The books will come home after half term so that, if you have any queries, you can discuss these with staff at Parents Evening. Each book contains the answers at the back of the book, and in previous years, we have asked parents to remove these and keep them in a safe place so that you can check that your child is on the 'right lines'!

Please complete the Microsoft form to advise how your child will be leaving at the end of the day.

In the meantime, if you have any queries, please don't hesitate to contact us.

Kind regards,

Mrs Whitaker
